

REACH DECLARATION

We hereby declare that our products, which have been manufactured with raw materials of multiple sources, do not contain any forbidden materials or substances of high safety concern.

We, or our raw material supplier, have not been registered with the ECHA because we are not legally required to by law, nor are we required by our patents on the product(s) If we register our primary source material, additive agents, and colorants, it would be possible for competitors to search for the components by registrant name on the ECHA website database, which would allow counterfeit manufacturers to obtain details as to the raw materials required in our products.

However, we fulfill our obligations set forth in EC Regulation 1907/2006, regarding the restriction of Chemicals (REACH).

We also fulfill our obligations set forth in the European directive on packaging and packaging waste 94/62/EC, including the rules for the use of heavy metals (Cadmium –CD-, lead- PFBC-Mercury –HG- and hexavalent chromium –Cr-VI- or compositions) not exciding 100 PPM by weight.
